

ABSTRACT

Therapeutic compounds of formula (I) wherein X is CH₂ or SO₂; R¹ is an optionally substituted aryl or heteroaryl ring; R² and R³ are various specified groups, R⁴ is a group NHCOR¹⁵, NHSO₂R¹⁵ or OCONR¹⁶R¹⁷ where R¹⁵, R¹⁶ and R¹⁷ are various defined groups; and R⁵, R⁶ and R⁷ are independently selected from hydrogen, a functional group or an optionally substituted hydrocarbyl groups or optionally substituted heterocyclic groups; and further provided that when R⁴ is a group NHCOR¹⁵, R¹⁵ is substituted alkyl, optionally substituted aryl or optionally substituted heteroaryl; as well as pharmaceutical compositions containing them are described and claimed. These compounds and compositions are useful in the treatment of disease mediated by MCP-1 (monocyte chemoattractant protein-1) or RANTES (Regulated Upon Activation, Normal T-cell Expressed and Secreted), such as inflammatory disease.
